

Battery Mate 1603 IG

Product code: 83116035

While battery isolators are conventional diode splitters, the Battery Mate's technology is electronic and includes mosfets (transistors). Its components compensate for the voltage drop and ensure that charging continues at the right voltage level, even with several battery banks.

The Battery Mate is compatible with any type of alternator/battery charger, in both existing and new systems. As the voltage loss between the alternator and battery is negligible, the Battery Mate performs far better than conventional battery isolators. This ensures fast and complete charging of your batteries without having to make additional adjustments to the alternator.

Charging two or three batteries at high capacity

Mastervolt's Battery Mate is ideal for alternators with a maximum charge current of 250 A. It can charge two or three batteries with a very high yield and without voltage loss.

Clear monitoring

Safety guaranteed: The Battery Mate LED display indicates whether the power input is active.

Specifications

General specifications

Number of battery outlets	3
Dimensions, hwxwd	207 x 140 x 80 mm
	8.1 x 5.5 x 3.1 inch
Weight	1 kg
	2.2 lb

Technical specifications

Max. output battery charger	120 A
Max. output alternator	160 A
